

POWERING THE WORKPLACE

PRODUCT GUIDE

■ POWERED BY SPECIALISTS

Electrak[®]
A brand of **legrand**

Global strength

built on local knowledge

Legrand is the global specialist in electrical and digital building infrastructures. Innovation is the driving force behind its development.

With an increasing investment in research and development (circa 5% of sales) and more than 4,000 active patents, the Legrand Group is focused on maintaining a high rate of new product launches that present innovative solutions to the market.

CORPORATE SOCIAL RESPONSIBILITY

Legrand's CSR roadmap is a natural extension to the governance and sustainable development approach in which the company has been engaged for many years. The CSR roadmap firmly asserts Legrand's ongoing commitment to sustainable development.

LEGRAND'S POWER DISTRIBUTION BUSINESS UNIT

From Zucchini transformers, through high power distribution and rising main busbar to Electrak powertrack, desk modules and lighting control, Legrand's power distribution business unit provides market leading solutions to the increasing demands of today's buildings.

CONTENTS

ELECTRAK[®]

the specialist in power
distribution throughout the
workplace

Electrak, a brand of the Legrand Group in the UK, is a leading name in power distribution and lighting control solutions.

Electrak busbar systems, floor boxes, floor grommets, desk modules and lighting control ranges are installed in high specification offices around the world.

Powering the workplace

UNDERFLOOR POWER

Electrak's powertrack system is perfect for supplying underfloor power in cavity floor installations. With minimal parts, push-fit assembly and a complementary range of floor boxes, this flexible, easy-to-install system can be reconfigured as office layouts evolve.

POWERTRACK

CAVITY FLOOR BOXES
See page 24

WORKSTATION POWER

Electrak's access grommets provide the gateway for power to feed from the underfloor powertrack network to the workstation, where all desk power requirements are met with our new range of desk modules, Intersoc, On-desk and In-desk.

ELECTRAK[®]

UK manufacturing
Global recognition

OVER 30 YEARS' EXPERIENCE

Legrand's cost-effective Electrak systems have been designed and manufactured to distribute power and data reliably and safely throughout the workplace. The original underfloor busbar system, invented by Electrak in the 1980s, sets the benchmark for flexible power distribution.

INDUSTRY EXPERTS

As part of its ongoing commitment to research and development, Legrand continually evolves its product ranges to ensure it develops the best and most innovative solutions available on the market. Legrand takes pride in its enviable reputation for market leading customer service, industry knowledge and product expertise.

QUALITY ASSURED UK MANUFACTURING

With its Electrak ranges manufactured from its UK base situated in the North East of England, Legrand can provide a rapid production response and adapt to ever-changing project demands. Having total production control also helps ensure our quality meets the highest standards.

BUILDING INFORMATION MODELLING

As part of Legrand's ongoing commitment to supporting construction, we have integrated a number of ranges into the BIM environment to assist all areas of project activity, from design and construction through to facilities management and beyond.

Autodesk Revit files are now available for Electrak powertrack, floor boxes, Under-desk (Intersoc-R) modules and Buscom trunking.

Download Revit files at: www.legrand.co.uk

POWERTRACK

adaptable, reliable

underfloor power

THE INDUSTRY STANDARD IN UNDERFLOOR POWER

Electrak powertrack / underfloor busbar is perfect for cavity floor installations. With minimal parts, push-fit assembly and a complementary range of floor boxes and grommets, this flexible, easy-to-install system can be reconfigured as office layouts evolve.

The system consists of continuous lengths of track which are fed via a feed unit and can be installed in floor voids as low as 48mm.

- 63 A rated, IP 40 protection
- Available in five versions: single phase, clean earth, dual circuit, three phase and auxiliary earth
- Tinned busbar version available for use within Abu Dhabi (see page 15)
- Available in 1.2 m, 1.8 m, 2.4 m and 3.6 m lengths
- Tap-off outlets are located at every 300 or 600 mm pitch
- Floor mountable (stand-off brackets also available)

Integral track connector plugs into feed unit

Lengths simply push-fit together

Integral fixing brackets for rapid installation

Tap-offs plug into shuttered socket outlets and lock onto track body

Electrak® powertrack / underfloor busbar system

Electrak tinned powertrack...

Designed to meet
local standards

Guideline For Design, Testing and Installation Of Busways GL.GN.01.

Issued by: Abu Dhabi Distribution Co.

Low Voltage Switchgear Committee

Issue: 2, Revision: 1, effective 01/02/2012

16. Lighting & Small Power Busways & Modular Wiring
Lighting & Power Socket bus duct and modular wiring are considered part of building wiring and regulated by the Electricity Wiring Regulation issued by RSB. It shall comply with respective specifications under the Wiring regulation. ADDC LVSGC approves these methods in principle provided that the RSB set aspects are incorporated (like tinning of copper, colour coding etc.).

Guideline For Design, Testing and Installation Of Busways GL.GN.01

Copyright Abu Dhabi Distribution Co.

Developed to meet the ADDC requirements for busways, these specially designed ranges see all busbars tinned along their entire length, and all busbar connectors and tap-off blades plated.

Approved and designed to be in accordance with the requirements of BS EN 61439-6 and BS EN 61534-22 (IEC 61534).

The Electrical Wiring Regulations 2007
Issued by: The Regulation and Supervision Bureau for the Water, Wastewater and Electricity Sector in the Emirate of Abu Dhabi. Revision 1, January 2009

7.7 Busways, bus ducts and busbar risers
7.7.6 Busways, bus ducts and busbar risers shall have neutral conductors of equal size to the phase conductors and shall have sSa dedicated Earth Conductor. The use of the metal casing as an earth conductor permitted only for Earth Leakage Protected Installations, and with the prior approval of the Distribution Company.

The Electrical Wiring Regulations 2007

Copyright The Regulation and Supervision Bureau (RSB)

The Electrak powertrack system uses equal size tinned copper busbars for live, neutral and earth conductors to meet with the requirements of The Regulation and Supervision Bureau of the Water, Wastewater and Electricity Sector in the Emirate of Abu Dhabi.

As a specific requirement for use within Abu Dhabi, Legrand has developed a 'tinned' busbar which has been designed in line with the guidance for busways outlined by the Abu Dhabi Distribution Company (ADDCC), as detailed below.

Electrak 28R tinned tap-offs

Electrak 28R tinned busbar connectors

Appendix 8. Colour identification for cables

| Conductor | Colour |
|--|----------------|
| Non-flexible fixed wiring and all 3 phase cables: | |
| Phase 1 | Red |
| Phase 2 | Yellow |
| Phase 3 | Blue |
| Neutral | Black |
| Earth conductors | Green / yellow |

To meet the local regulations, tap-offs designed for sale within this region are supplied with the following cable colours:

Within any single phase system (e.g. Electrak 25R or Electrak 28R) - red (L), black (N) and green/yellow (E).

Specifically within the 3 phase Electrak 27 system - L1 tap-offs are red (L), black (N) and green/yellow (E); L2 tap-offs are yellow (L), black (N) and green/yellow (E); L3 tap-offs are blue (L), black (N) and green/yellow (E).

Appendix 9. Capacity of conduits and trunking

| Conduit (mm ²) | Diameter of Conduit (mm ²) | | |
|-------------------------------------|--|----|----|
| | 20 | 25 | 32 |
| Maximum number of conductors | | | |
| 1.5 | 7 | 12 | - |
| 2.5 | 5 | 9 | 12 |
| 4.0 | 3 | 6 | 9 |

The tap-offs contain a maximum of 2 x 4 mm² conductors (excluding earths) housed in a 20 mm ø metal flexible conduit.

NOTE: When designing installation in regions with higher ambient temperatures than 35°C, de-rating factors may need to be applied. Please refer to the table on page 22 for details.

Electrak® powertrack / underfloor busbar system

design and installation

General installation notes

Electrak powertrack is a compact system that can be installed in floor voids as low as 48 mm

Feed units are provided with one or two 25 mm diameter holes suitable for MICCC, armoured cables or single core cables in conduit
Track lengths connect together and to feed units using the integral connectors on each length

Lengths should always be secured using the integral floor fixing brackets ; three on the 3.6 m length and two on 2.4 m, 1.8 m or 1.2 m lengths

Access to power is provided along the busbar length by simply plugging tap-off units into shuttered socket outlets. These tap-off units feed all types of conventional floor service outlet boxes or feed workstations directly through the floor via insulated conductors contained in flexible metal or VO rated nylon conduit. When connecting tap-offs directly through the floor via grommet outlets to workstations care must be taken to ensure that the tap-off length is adequate

The dual system has both standard and low noise / clean earth systems incorporated. As well as dual tap-offs, both standard and low noise / clean earth tap-offs can be plugged into any socket outlet along the busbar length. The dual tap-off incorporates both standard and low noise cables

Optimum layout flexibility is achieved by positioning busbar lengths a maximum of 5.2 m apart and 2.5 m from the wall, and by connecting the 3 m tap-off units to floor outlet boxes. This means every part of the floor area can be served. Flexible interlinks can be used to overcome obstructions or used as corners if required

Dimensions

Example floor layout

All dimensions (mm) are nominal

Special fixing brackets

Electrak special fixing brackets are available to raise the system by 21 mm. Ensure brackets are spaced 600 mm apart and always have support under the integral connectors and feed units. Failure to do so may undermine the integrity of the system

Cat. No. DZ1210 raised off-floor fixing brackets are spaced at 600 mm centres along the busbar run. Also use bottom half of bracket under feed unit and flexible interlink

Cat. No. DZ1230 raised off-floor fixing brackets are always used under integral connectors. Busbar is secured to raised brackets using the integral fixing bracket

Product configuration

Flexible interlink

Tap-off connection

Standards

BS EN 61534-22
and IEC 61534-22

Manufactured within an approved ISO 9001 and ISO 14001 facility
Assessed Quality Assurance Certificate No. 2029
Electrak powertrack / underfloor busbar fully complies with the
requirements of BS 7671

Classifications according to BS 61534-22

| | | |
|--------------|---------------------------------|--|
| 7.1 | Resistance to impact | Medium impact – 5J |
| 7.2.2 | Connection | Tap-off is intended to be connected/disconnected when the system is energised but without a load connected |
| 7.3 | Degree of protection | IP40 |
| 7.4 | Degree of pollution | Pollution degree 2 |
| 7.5 | Rated impulse withstand voltage | Category III - 4kV |
| 7.101 | Type of floor treatment | Dry treatment of floor |
| 7.102 | Intended location | Underfloor powertrack system |

Ambient temperature rating factors

The current carrying capacity for a powertrack / underfloor busbar (I_n) is affected by the ambient temperature
For Electrak powertrack / underfloor busbar the ambient rating factor K_α is equal to 1 for ambient temperatures up to and including 35° C

$$I_z = K_\alpha I_n$$

Where :

I_z = effective current carrying capacity for continuous service under particular installation conditions

K_α = ambient temperature factor

I_n = nominal current carrying capacity

For ambient temperatures exceeding 35° C the values of K_α and I_z are given in the following tables

| Powertrack / underfloor busbar system | | | | | | | |
|---------------------------------------|------|------|------|------|------|------|------|
| Ambient | 20°C | 25°C | 30°C | 35°C | 40°C | 45°C | 50°C |
| K_α | 1 | | | 0.95 | 0.85 | 0.80 | |
| I_z | 63 A | | | 59 A | 53 A | 50 A | |

| 32 A unfused tap-off (using thermosetting 90°C cables) | | | | | | | |
|--|------|------|------|------|------|------|------|

|--|------|------|------|------|------|------|------|
| Ambient | 20°C | 25°C | 30°C | 35°C | 40°C | 45°C | 50°C |
| K_α | 1 | | | | | | |
| I_z | 13 A | | | | | | |

References :

BS 7671

Earth fault loop impedance

BS 7671 requires accurate determination of the total earth loop impedance, which must be sufficiently low to allow the protective device to operate within the specified time, which for socket outlets is 0.4 seconds. The values relevant to Electrak powertrack / underfloor busbar for calculating the earth fault loop impedance are shown in the electrical test data table, see opposite

Durability

Electrak systems are superbly designed and extremely robust. They can be expected to stand up to all normal site conditions. Electrak powertrack / underfloor busbar has been short circuit strength tested

Installations with high protective conductor currents

All unfused tap-offs comply with Regulation 543.7 without the need for additional earth conductors. Regulation 543.7.1.203 (ii) states "a single copper protective conductor having a cross-sectional area of not less than 4 mm², complying with the requirements of Regulations 543.2 and 543.3, the protective conductor being enclosed to provide additional protection against mechanical damage, for example, within a flexible conduit"

For installations with high protective conductor currents requiring fused tap-offs, a 543.7 compliant tap-off must be used. Normally fused tap-offs incorporate 1.5 mm² conductors, however in our fused 543.7 tap-offs, the 1.5 mm² earth conductor is replaced with a 4 mm² conductor and are therefore compliant with Section 543.7.1.203 (ii)

32 A tap-off unit

The 3 m 32 A tap-off unit comprises an unfused tap-off with 2.6 m of flexible metal conduit with integral 4 mm² LSOH conductors

These units are designed to comply with Regulation 543.7.1.203 (ii) of the IET Wiring Regulations by virtue of the following :

- maximum length of cable is 3 m
- it is factory assembled and fully tested item with cable installed in high quality flexible conduit

Fault condition protection for the tap-off assembly and the floor box socket outlets is delivered by the circuit protection device
Disconnection time for socket outlets is 0.4 seconds (Regulation 411.3.2.2). The Electrak system meets this requirement

Tap-off units in excess of 3 m should only be used if they contain a fuse or the busbar run is protected by a protective device not exceeding 32 A

FLOOR BOXES

choice, flexibility &

easy installation

Raised access floor boxes and slab boxes offer complete versatility.

Floor boxes are available pre-wired with powertrack tap-off, or supplied empty (unassembled), with a choice of single or separate compartment bases and three depth options. With a vast selection of power and data plates available, boxes can be tailored to the specific requirements of each office installation.

NOTE : Please consult us for different plate options on +44 (0) 370 608 9020. Photos are only illustrative.

Available in 2, 3 and 4 compartments and with a choice of three depths, Electrak floor boxes have been developed with a host of special features:

- Available pre-wired with tap-off or supplied unassembled
- A wide selection of power and data plates, including RCD options
- Single or separate compartment bases for ease of data cabling
- Rapid installation and fast ratchet mechanism which adjusts to floor finish thickness

- 1** Rapid fit /remove mechanism adjusts for flooring thickness
- 2** Quick-fit, reversible lid for rapid installation
- 3** Durable ABS trim and lid surround
- 4** Various RCD protection options available

- 5** Rapid fit push lock secures base in floor aperture
- 6** Available pre-wired with tap-off
- 7** Three depth options: 75 mm, 85 mm, 110 mm
- 8** Single or separate compartment bases

NOTE : Please consult us for different plate options on +44 (0) 370 608 9020. Photos are only illustrative.

Pre-wired floor boxes can be supplied with RCD 30 mA rather than standard sockets. Add an **R** to the end of the part numbers for a RCD 30 mA version or an **RS** for a RCD 30 mA switched socket version.
 TSSO = twin switched socket outlet
 For example CR100**R** is a 3 compartment floor box with a twin RCD socket and a DP1332 tap-off

Lid and trim mouldings are precision engineered from hard wearing durable ABS. Lid is reinforced with a galvanised mild steel plate. Mounting frame and box base - 0.9 mm thick galvanised steel. Each compartment has 2 entries for 20 mm and 2 entries for 25 mm flexible conduits. Grey mouldings. Alternative colours available to special order. Grey plates. 2, 3 and 4 compartment boxes are also available with separate individual compartment base units for convenient offsite pre-wiring. Supplied in parts or fully assembled and configured to customer specification. Conform to BS EN 61534-22.

Pre-wired floor boxes can be supplied with RCD 30 mA rather than standard sockets. Add an **R** to the end of the part numbers for a RCD 30 mA version or an **RS** for a RCD 30 mA switched socket version.
TSSO = twin switched socket outlet
For example CR100**R** is a 3 compartment floor box with a twin RCD socket and a DP1332 tap-off

 Also available :
- pre-wired boxes with fused tap-offs
- shallow or deep versions
- separate compartment bases

access floor service outlet boxes

technical information

Floor boxes

Dimensions

Lid can accommodate carpets up to 6 mm depth
Accessory plates are 172 mm long, with 162 mm fixing centres

Materials

Lid and trim mouldings are precision engineered from hard wearing durable ABS. Lid is reinforced with a galvanised mild steel plate
Mounting frame and box base – 0.9 mm thick galvanised steel
Floor service unit conforms to BS EN 61534-22

Wiring

Each compartment has 2 entries for 20 mm and 2 entries for 25 mm flexible conduits

Colour

Grey mouldings. Alternative colours available to special order
Grey plates

Dimensions from top of floor tile into floor void

| A (mm) | B Accessory box depth (mm) | C Underside lid to top of accessory (plug clearance) (mm) |
|--------|----------------------------|---|
| 75 | 35 | 35 |
| 85 | 45 | 35 |
| 110 | 45 | 60 |

Screed floor boxes

| Compartment | W (mm) | L (mm) |
|-------------|--------|--------|
| 3C | 350 | 245 |
| 4C | 350 | 245 |

To install access floor box

Cut hole in raised floor tile, lower complete box into aperture and push firmly down

Floor tile cut-out dimensions

2 compartment : 263 mm x 203 mm¹

3 and 4 compartment : 340 mm x 203 mm¹

Floor cut-out aperture is the same for single base or separate compartment base

To fit carpet :

Detach lid and trim assembly by lifting the blue locking handles and lifting out. Cut and fit carpet. Push lid and trim assembly back into place

1 : The aperture dimension 203 mm has a fixing tolerance between 203 to 205 mm

FLOOR GROMMETS

perfectly balancing

capacity & size

ACCESS GROMMETS

The Electrak range of simple-to-install access grommets allow cables and conduit to link between underfloor power and desk power systems.

- Ranging from 144 mm to 232 mm in diameter
- 169 mm diameter grommet can accommodate up to 3 x 32 mm conduits - perfectly balancing capacity and size
- Push-fit lid with optional screw fixing to prevent unauthorised access

POWER AND DATA GROMMETS

The Electrak range of cleaner's grommets are the latest addition to its power and data grommets range. Within their 169 mm diameter, the grommet can house a flat RCD 30 mA socket and provide ample space for the user to plug in or unplug equipment.

- Cleaner's grommet with flat mounted RCD 30 mA socket or standard socket options
- Push-fit lid with cable flap feature
- Spring loaded screws for rapid installation
- Available pre-wired to powertrack tap-off

- 1 Removable inlay for optional carpet fitting
- 2 Cable flap allows permanent connection of services
- 3 Flat mounted RCD 30 mA socket

- 4 169 mm diameter provides the perfect balance between size and capacity
- 5 Spring loaded screws for rapid installation
- 6 Available pre-wired to powertrack tap-offs

floor grommets

technical information

144 mm Ø plastic floor grommet

Dimensions

Cat. No. EG0010

169 mm Ø plastic floor grommets

Dimensions

Access grommet

Cat. No. EG0030

Power grommets

Cat. Nos. EG0040, EG0045, EG0051, EG0052

Recommended hole cutter is a 6"/152 mm hole saw blade

232 mm Ø plastic floor grommet

Dimensions

Large quick fit grommet
Cat. No. EG0055

Floor panel cut-out diameter

Recommended hole cutter is a adjustable hole saw blade with Ø range of 40 mm - 300 mm

To install plastic floor grommets

A

Lift handle and pull to remove lid

B

Push grommet into raised floor tile aperture
Push down spring loaded screws and rotate quarter turn to secure
Ensure wings are located under floor panel
For honeycombed floor panels one wing should face downwards and one wing should face upwards

C

Drop cable access insert into housing opening

D

Slide lid into lug holes

E

(1) Push down lid to close
(2) If grommet is not in use, replace cable access insert

144 mm Ø aluminium grommets

Access grommet

Cat. No. EG0015

13 A power grommet

Cat. No. EG0025

Recommended hole cutter is a 5"/127 mm hole saw blade

INTERSOC-R™

fast, reliable, adaptable

modular
desk power

COMPLETE SOLUTIONS FOR DEMANDING ENVIRONMENTS

Intersoc-R is a modular desk power system designed to meet the demands of modern workplaces for faster and more adaptable solutions.

Designed with speed of installation and flexibility in mind, Intersoc-R's modular configuration enables thousands of different combinations to be made - providing solutions for every installation requirement.

- Modular system - rapid configuration and easy workstation relocation
- Push-fit connection - modules can simply be disconnected and additional modules inserted
- Busbar interconnection - no need for wiring
- Easily adapted to meet the changing demands of the workplace

The next GENERATION of power distribution

Available in standard and clean earth versions, with fixed or rotatable socket options and a safe shuttered electrical connection, Intersoc-R is the next generation of power distribution...

- Simple push-fit, module connection with auto-lock mechanism creates robust joints and makes installation quicker and easier
- 32 A system with safe shuttered electrical connections for additional safety, meets the requirements of BS 7671 : 2018 (including section 543.7)
- MCB, RCD and RCBO modules, with reversible hinged covers, provide a full range of circuit protection options
- 2, 3 or 4 gang British standard socket modules with fixed or rotatable, fused or unfused (BS 6396) sockets options - all the options you need to meet the requirements of any installation
- Outgoing connections: flexible interlink or end cap with ST or GST options

Intersoc-R™ desk modules

electrical supply

Dimensions and technical information **p. 44-47**

Intersoc-R features fast modular connection with push-fit auto lock mechanism, safe shuttered electrical connections and a robustly designed rigid joint between modules. Available in standard and clean earth versions
Independently approved by Intertek. Complies with BS 5733 and the relevant parts of BS 1363 part 2. Manufactured in an approved ISO 9001 facility. Meets the requirements of BS 7671 for high integrity earthing (section 543:7)

British Standards

BS 6396 + A1 Electrical Systems in Office Furniture and Educational Furniture Specification

BS 7671 incorporating amendment No. 3. Requirements for Electrical Installation (IET Wiring Regulations 18th Edition)

Electricity at Work Regulations 1989

Health & Safety Legislation

Below is a brief outline of the main criteria within the standards :

BS 6396 + A1 was published with regard to the use of electrical equipment within general office and educational furniture. This standard sets out in its scope the use and testing of electrical socket outlets and associated wiring when used together with a 13 A BS 1363 fused plug for mains supply and makes provision for the routing of cables through furniture.

For compliance with this standard, socket outlet configurations of up to 4 outlets should be individually fused at 5 A and up to 6 outlets individually fused at 3.15 A.

A note on individual socket fusing – BS 6396 Compliance :

The standard requires individual socket fusing (as per the table below)

| Total number of sockets | Individually fused at |
|-------------------------|-----------------------|
| 2, 3 or 4 sockets | 5 A |
| 5 or 6 sockets | 3.15 A |

Meets the requirements of BS 7671

The Health and Safety Executive states that installations which conform to the standards laid down in BS 7671 are regarded by the HSE as likely to achieve conformity with the relevant parts of the Electricity at Work Regulations 1989.

Special note should be taken of regulation 543.7 within BS 7671 - Earthing requirements for the installation of equipment having high protective conductor currents.

Regulation 543.7 has particular importance when there is a requirement for a quantity of information technology equipment being supplied from a final circuit in a location where the sum of their protective currents exceeds 10 mA in normal use. Due to current in the protective conductor arising from the use of IT equipment, there is a requirement to provide mechanically protected 4 mm² conductor (543.7.203 (ii)). Intersoc achieves this when wired in accordance with the installation sheets by providing mechanically protected 5 mm² protective conductors within the product.

Material specification

| | |
|-----------------|---|
| Module housing | heat resistant ABS |
| Socket outlets | polycarbonate |
| Busbars | high conductivity copper CW004A (C101) |

Intersoc and Intermod under-desk modules

installation and configuration

■ Installation

To connect and disconnect Intersoc modules

1. Connection / disconnection to be made by a competent person
2. Before connecting modules ensure they are the correct way up and in line
3. Push modules together one at a time
4. Modules self-lock when fully pushed together
5. To disconnect modules slide green latch to unlock module and pull apart
6. Always end module run with blank end cap or interconnect

To fix modules to surface

1. Insert through all fixing holes no. 8 pozi-pan screw or M4 bolt to required length
2. Tighten screw / bolt down to mounting surface

Product configuration

1. Select the type of distribution system - standard, or low noise / clean earth
 2. Select the means of powering the system - cable or powertrack tap-off
 3. Select the type of in-feed module to match the cable capacity - 16 A or 32 A
 4. Select the means of protection
 5. Select the number of socket modules from the 2, 3 or 4 gang range (individually fused or unfused)
 6. Select fixed or rotatable sockets
 7. Select the interconnection units if required
 8. Finish system with the end cap
- (All modules push fit and lock together on-site or can be factory assembled to customer requirement)

ON-DESK

power and data for
modern workspaces

ON-DESK RANGE BRINGS POWER, DATA AND RAPID USB CHARGING TO THE MODERN WORKSTATION

With clean lines and a stylish aluminium and mirror white finish, Electrak on-desk's ergonomic design blends in perfectly with contemporary office design schemes and enhances the functionality of the desk space.

Tailored to your requirements

Configuring on-desk modules to your exact requirements couldn't be simpler. Select any combination of power sockets and USB charging modules, and further enhance functionality with plug and play data solutions or Euro modules. Legrand's modular wiring accessories, including a range of AV solutions, can also be incorporated.

Putting 'personal' back into desk power and data... Intersoc on-desk can be tailored to the demands of any workstation

RAPID USB CHARGING

Intelligent twin USB A charging modules offer rapid charging for two devices at the same time. Please contact us for USB C and USB C PD charging options with capabilities to charge devices up to 20 V.

HIGH PERFORMANCE DATA

On-desk offers plug and play CAT 5e and CAT 6 data options or CAT 6A keystone jack modules for higher performance. Euro module options are also available to accommodate a customer's specific data requirements. The innovative design of Intersoc on-desk enables data cables to neatly feed through the rear of the unit (see below).

 Watch the on-desk video at www.youtube.com/LegrandtvUK

The entire Electrak system is powered by a reliable busbar backbone, from powertrack right through to on-desk modules.

Power is fed to the on-desk unit via a choice of 13 A pre-wired plug, GST connector or an Intersoc-R under-desk connector.

CAT 5e and CAT 6 data outlets are fed neatly from the rear of the unit via simple RJ45 connection (patch leads not supplied).

RELIABLE DESKTOP CONNECTIVITY

CAT 5e / 6 / 6A
RJ45 outlets

ON-DESK...
DELIVERING POWER,
DATA AND RAPID USB
CHARGING TO THE
MODERN WORKPLACE

The fast pace of modern work practices combined with the need for instant connectivity is placing an ever greater reliance on the use of multiple devices, whether it be at our workstation or whilst we're on the move. The new range of Electrak on-desk modules offers a convenient answer to the growing demand for user-specific desk power and data access.

Electrical Systems in Office Furniture and Educational Furniture Specification

Below is a brief outline of the main criteria within the standards :

BS 6396 + A1 was published with regard to the use of electrical equipment within general office and educational furniture. This standard sets out in its scope the use and testing of electrical socket outlets and associated wiring when used together with a 13 A BS 1363 fused plug for mains supply and makes provision for the routing of cables through furniture

The standard requires individual socket fusing (as per the table below)

| Total number of sockets | Individually fused at up to |
|-------------------------|-----------------------------|
| 2, 3 or 4 sockets | 5 A |
| 5 or 6 sockets | 3·15 A |

BS 6396 + A1 requires RCD protection for electrical sockets

Material specification

| | |
|----------------|---------------------|
| Module housing | aluminium / PVC |
| Module fascia | polycarbonate / ABS |
| Socket outlets | polycarbonate |
| End caps | ABS |

USB charger module specification

| | |
|--------------------------|------------------------|
| Supply voltage (nominal) | 230 V (AC) |
| Supply current | 1·3 mA |
| Power consumption (max.) | 0·3 W |
| Frequency | 50 Hz |
| Output voltage | +5·0 V ± 0·25 (DC) |
| Output current | 3·1 A |
| Output power | 15 W (max.) |
| Over current protection | 3·8 A (max.) |
| Output connectors | 2 x USB Type A sockets |
| Current per socket | 2·1 A (max.) |

All dimensions (mm) are nominal

ELECTRAK IN-DESK

enhancing the workstation

IN-DESK BRINGS STYLE AND FLEXIBILITY TO THE WORKSTATION

Made from high quality brushed stainless steel, In-desk is designed to complement the aesthetic of modern workspaces, giving users power when they need it and minimal, sleek design when they don't.

With the simple touch of a button, the unit elegantly rises from the desk in a smooth action to reveal either a traditional twin socket arrangement or a single socket with twin USB outlets for charging mobile devices.

EASY INSTALLATION

The Electrak In-desk range is pre-wired with a BS plug, GST or Intersoc-R connector for simple tool-free electrical connection.

MINIMAL AND DISCREET

When power isn't required, the ultra-slim brushed stainless steel cover closes to fit discreetly into the desktop.

POWER SET FREE

wireless charging

Legrand's Qi certified induction charger can be easily installed into desks, tables and other furniture – allowing Qi enabled smartphones and other mobile devices to be charged simply by placing them on top.

Charging has never been more simple.

Extra flat, supplied with a micro USB/USB cable and a USB mobile power supply (Cat. No. 077580).

Storage temperature : 20°C to +70°C
Operating temperature : 0°C to +45°C

Standards and approvals

WPC QI
BS EN 62479
ICNIRP

Mechanical characteristics

Impact resistance : IK 08
Resistance to ingress of solid bodies and liquids :
• IP 43
• IP 44 for upper part installed on furniture

Material characteristics

ABS
Halogen free
UV resistant
Self-extinguishing :
• 750°C / 30 s for parts made of insulating materials holding live parts in place
• 650°C / 30 s for other insulating components

All dimensions (mm) are nominal

BUSCOM TRUNKING

a unique

power & data backbone

Buscom is at the heart of Electrak's lighting control solutions... It provides a flexible and simple alternative to cabled installations.

THE HEART OF YOUR LIGHTING CONTROL SYSTEM

Installing a matrix of Buscom trunking creates an accessible power and communications backbone. The backbone can be tapped into at any point to facilitate instant connection to power and control circuits. Buscom incorporates an integral shielded twisted pair, and is suitable for use with any lighting control protocol, including: LonWorks and DALI.

MODULAR. FLEXIBLE. SIMPLE.

Trunking lengths simply push fit together, saving time and money on installation. With cable terminations only required for power and control circuits in the feed unit, Buscom delivers a plug and play solution that allows for future lighting layout changes to be made quickly and efficiently.

BUSCOM ADDS A NEW DIMENSION TO LIGHTING BUSBAR

Buscom extends the unquestionable plug and play advantages from the power circuit to the control circuit.

This unique system for distributing lighting control signals delivers unrivalled flexibility, regardless of the location of the intelligence...

- Power and communications within a single trunking system
- Suitable for use with any lighting control protocol, including: LonWorks and DALI
- Modular, flexible system which is quick and simple to install and adapt
- Reduced potential points of failure in comparison with traditional wiring installations

THE INTELLIGENT SOLUTION

INTELLIGENCE IN THE PANEL

Lighting control modules located in a central cabinet are connected to the Buscom system via communication circuits. Control signals are then distributed along the trunking run and made available at any tap-off outlet.

INTELLIGENCE IN THE BUSBAR

Integrating lighting control technology into Buscom trunking is particularly effective for DALI control. Each trunking run converts to an individual DALI network into which luminaires can tap-in at any point.

INTELLIGENCE IN THE LCU

Lighting control units (LCUs) are mounted onto and plugged into Buscom trunking, providing a hub for multiple luminaires and switching devices to plug into. Buscom's integrated communication bus provides the backbone network to control all devices.

 Dimensions and technical information **p. 68-73**

Brackets are manufactured from robust galvanised steel, ensuring that the entire installation can be expected to stand up to all normal site conditions

| Pack | Cat. Nos. | Fixings |
|------|-----------|--|
| 1 | EEA308 | Trunking suspended fixing bracket |
| 1 | EEA312 | Trunking suspended fixing bracket c/w cable duct stirrup. Used when running cable duct on top of buscom trunking |
| 1 | EEA324 | Luminaire suspension fixing bracket |
| 1 | EEA328 | Luminaire 45 mm edge suspension fixing bracket (clip on) |
| 1 | EEB340 | Open hook luminaire suspended bracket |
| 1 | EEB344 | Closed ring on luminaire |
| 1 | EEC348 | Cable duct 3 m long x 50 mm(w) x 13 mm(h) |
| 1 | EEC352 | Joint bracket cable duct |
| 1 | EEC356 | Cable duct fixing bracket |

| Pack | Cat. Nos. | Ancillary items |
|------|-----------|---|
| 1 | EEC356 | 2 m empty length for adjusting the length at the end of a run (to be cut) |
| 1 | EEC364 | Joint sleeve is used if load is hung off trunking joint or near when joint is centre of a fixing span |
| 1 | EEC366 | Left hand end stop spare |
| 1 | EEC368 | Right hand end stop spare |

Electrak® Buscom trunking

technical information

Standards

Intertek

ASTA approved to BS EN 61439-6
 Manufactured within an approved ISO 9001 and ISO 14001
 Electrak Buscom fully complies with the requirements of BS 7671

Buscom trunking options

- L
- N
- PE
- L2
- N2
- L1
- N1
- PE
- Communication bus

Electrak Buscom trunking can be used with Electrak's cost effective lighting control system, Lightrak, or any other systems using control protocols such as Lonworks, DALI, etc.
 Electrak's overhead trunking couples high quality engineering with rigidity of design, and provides power for a variety of applications including lighting, heating and ventilation. The robust easy fix modular system permits loads to be suspended directly from the trunking using Electrak's various fixing brackets
 Push fit connection keeps installation costs to a minimum

Track lengths simply push fit together

Feed units

25 A rated - max. conductor size 6 mm²
 40 A rated - max. conductor size 16 mm²
 IP 4X galvanised steel

2 pole + earth + comms
 Comms bus
 Max. conductor size 1.5 mm²

Electrak® Buscom trunking

technical data

Communication control circuit

| | |
|--|--|
| Type | Bus cable (LSOH) |
| Construction | Sheathed 0.5 mm ² copper twisted pair |
| Insulation - conductor | Flame retardant low emission HCL |
| Sheath | LSOH material |
| Rated insulation voltage (Ui) (between power circuit and bus) | 500 V |
| Max. bus operating voltage | 50 V |
| Max. bus operating current | 0.65 A |
| Max. conductor resistance (@20°C) | 73.2 Ω/km |
| Max. mutual capacitance | 100 nf/km |
| Material specifications | |
| Buscom trunking housing | Galvanised steel |
| Busbars | High conductivity copper |
| Busbar insulator | Flame retardant LSOH to BS 7211 |
| Trunking connector / tap-off entry box / cable connector | Flame retardant polycarbonate |
| Tap-off housing | Flame retardant polycarbonate |
| Trunking connector blades / tap-off blades | Copper |
| Feed unit IP 4X | Galvanised steel |
| Feed unit IP 54 | ABS |
| Flexible length conduit | Flame retardant LSOH nylon |
| Feed unit terminals / earth block | Brass |
| Brackets | Galvanised steel |
| 13 A tap-off, fuse | To BS 1362, ASTA approved |

Durability

Electrak power and communications distribution systems are well designed and extremely robust. They can be expected to stand up to all normal site conditions. Electrak Buscom has been short circuit strength tested

Earth fault loop impedance

BS 7671 require accurate determination of the total earth loop impedance, which must be sufficiently low to allow the protective device to operate within the specified time, which for socket outlets is 0.4 seconds

The values relevant to Electrak Buscom for calculating the earth fault loop impedance are shown in the electrical test data table, see opposite

Buscom trunking rating in ambient temperatures

| Average ambient air temperature | 25°C | 30°C | 35°C | 40°C | 45°C | 50°C |
|---------------------------------|------|------|------|------|------|------|
| Rating factor (K1) | 1.1 | 1.05 | 1 | 0.95 | 0.90 | 0.85 |

For ambient temperatures other than 35°C apply the multiplier factor K1 to the rated current

Buscom trunking mechanical loading

For point loads and evenly distributed loads the maximum weight that can be supported is given below

Maximum loading for suspended buscom trunking

| Fixing distance (m) | 1.5 | 2 | 2.5 | 3 | 3.5 | 4 |
|--|-----|----|-----|----|-----|----|
| Max. point load (deflection = 1/500 x span) (Kg) | 20 | 17 | 13 | 12 | 9 | 7 |
| Max. distributed load (deflection = 1/500 x span) (Kg) | 33 | 28 | 22 | 20 | 15 | 12 |
| Max. point load (deflection = 1/350 x span) (Kg) | 33 | 24 | 18 | 16 | 10 | 9 |
| Max. distributed load (deflection = 1/350 x span) (Kg) | 55 | 40 | 30 | 26 | 16 | 15 |

Notes

- Where trunking joints occur in the middle of the suspension span, and weight is to be suspended from that point, it is recommended to use a strengthening bracket EEC364 over the joint to stop deflection
- If the load requirements exceed the above figures, please contact us on +44 (0) 370 608 9020
For design information and technical specification, please contact us on +44 (0) 370 608 9020
Suspension rods and fixings should be of suitable size to carry the weight of both the track and suspended load

Rewirable and phase selection tap-offs – 35 mm deep

Electrak® Buscom trunking

installation

■ Design and installation

Electrak Buscom trunking system comprises continuous lengths of galvanised steel trunking available in 2 m and 3 m lengths with integral connectors and regular tap-off outlets

Each trunking run commences with a feed unit for electrical and comms bus cable termination. The connection between the trunking, the feed unit and subsequent trunking lengths is push fit and requires no tools to terminate the connection or ensure good earthing. Each complete track run is finished with an end stop

The trunking system is supplied with IP 4X ingress protection, fully factory tested and approved to BS EN 61439-6 and is designed to meet the requirements of BS EN 61534-22

Push fit connection

- 1 To install - push fit parts together
- 2 To take apart - use a screwdriver to depress the locking catch

Considerations before installation

Calculate the distance between fixing brackets - the maximum fixing distance should not exceed 4 m. If loads are to be hung, please consult loading charts on page 69. The maximum Buscom trunking weight is 2 kg/m. When fixing brackets to drop rods or surfaces, see mounting details below

Suspended trunking fixing brackets
