

CPD seminar

Specifying central power supply systems

This presentation aims to provide a guide to specifying Central Power Supply Systems (CPSS).

At the end of this seminar, participants will have examined:

- An introduction to 'central power supply systems'
- BS EN 50171:2001 and related standards
- Design considerations
- Environmental factors
- How to specify the system

SEMINAR CONTENT

- Explaining BS EN 50171:2001 - Why is it important and 'green' issues
- Technologies - Modular and monolithic
- Where to use them
- Links to other standards including BS 8519:2020, BS 9999, BS 7671:2018, BS5266-1:2016 etc.
- Integrated systems and linking with other Legrand systems, products and services
- Regulations and standards
- Summary
- Further learning
- Q&A

TARGET AUDIENCE

This seminar is ideal for:

- Architects
- Product specifiers
- Facilities managers
- Electrical consulting engineers
- Electrical contractors
