

CPD seminar

Implementation of modular UPS design in a PAYG business model

This presentation explores the concept of a PAYG (Pay as you Grow) business model in relation to the implementation of modular UPS. The seminar considers the available technologies and explores the advantages and the limitations whilst also taking into account relevant design considerations. The seminar considers industry drivers, and a detailed case study is also presented. The learning objectives look at why and how to implement Scalable/Modular UPS for a “Pay as you Grow” business model.

Topic areas to be discussed include:

- Understanding the technologies
- Understanding the advantages and limitations
- Design considerations
- How to specify

SEMINAR CONTENT

- Define the terminology: fixed, modular and scalable
- Explore why Scalable or modular solutions are required, PAYG
- Explore Resilience definitions
- Design considerations with mod/ scale solutions
- Firmware upgrades, planning for expansion
- Extending flexibility throughout your data centre
- Summary
- Specification
- Regulations and standards
- Further learning and case studies
- Q&A

TARGET AUDIENCE

This seminar is ideal for:

- Architects
- Designers
- Product specifiers
- Facilities managers
- Electrical consulting engineers
- Electrical contractors
- Clients
- Students

DURATION

1 hour (to include a Q&A session)

LOCATION

Virtual via Microsoft Teams or face-to-face at your offices
