

CPD seminar

Implementing tier rated solutions in line with the Uptime Institute guidelines

This presentation explores the tier ratings of resilience as defined by the Uptime Institute and examines how UPSs can be incorporated into these guidelines.

The seminar also examines additional considerations in relation to synchronising parallel UPS and generator interfacing. Industry drivers are discussed and a detailed case study is also presented.

Topic areas to be discussed include:

- Understanding the definitions of tier ratings
- Look at how UPS can be incorporated in to these guides
- Synchronising parallel supplies
- Discuss generator integration and potential issues

SEMINAR CONTENT

1. What are tier ratings?
2. Definitions of tiers
3. Interpretations of Tiers 1 through 4
4. Additional considerations:
 - Synchronising parallel UPS
 - Generator interfacing
5. Summary
6. Specification
7. Regulations and standards
8. Further learning and case studies
9. Q&A

TARGET AUDIENCE

This seminar is ideal for:

- Architects
- Designers
- Product specifiers
- Facilities managers
- Electrical consulting engineers
- Electrical contractors
- Clients
- Students

DURATION

1 hour (to include a Q&A session)

LOCATION

Virtual via Microsoft Teams or face-to-face at your offices
