

CPD seminar

Fire Stopping: Breaking the Cycle of Non-Compliance

This seminar provides discussion around the importance and relevance of fire stopping cable pathways and offers solutions to the issues surrounding cable moves, adds and changes. It also offers an overview of the complex nature of fire safety responsibility and demonstrates how to achieve successful fire protection and containment whilst breaking the cycle of non-conformance.

Learning Objectives:

- A reminder of the importance and relevance of **fire stopping** cable pathways
- Discuss the factors involved to achieve **successful** fire protection and containment
- Understand the need for future **flexibility** of cable moves, adds and changes
- Overview of types of cable pathway **fire stopping** systems
- Discuss national and international **testing, certification, standards and regulation**
- Be aware of the complexity around **fire safety responsibilities**
- **Share solutions** including specification checklist
- **Non-conformance** and how to break the cycle

SEMINAR CONTENT

- Fire protection
- Fire containment
- Fire safety responsibility
- Cable moves, adds & changes
- Types of fire stopping systems
- Cable penetration seals
- Checklist
- Standards & regulations
- Summary
- Further learning
- Q&A

TARGET AUDIENCE

This seminar is ideal for:

- Architects
- Clients
- Designers
- Developers
- Electrical engineers
- End users
- Specifiers
- Surveyors

DURATION

1 hour (to include a Q&A session)

LOCATION

Seminars can be carried out at our Birmingham head office or delivered at client premises anywhere in the UK.

Legrand Training Centre, Great King Street North, Birmingham, B19 2LF
